

ASG HOPE Foundation bridges the gap between K-12 and corporate America by connecting students to technology solutions and professionals in the supply chain. With the help of our Partners, we are committed to finding and supporting the next generation of supply chain and logistics leaders.

Foster the Next Generation

Giving to ASG HOPE Foundation means more than financial support. It means that you are creating an example for future entrepreneurs, inventors, investors, managers, and more—from their first encounter with the industry to their first step into the workforce.

Donations create workshops, industry tours, mentorship programs, and scholarships for students. It is with your help that we can bring HOPE—Helpful, Optimistic, Positive, Effective—education to the next generation of supply chain and logistics leaders.

In addition to the monetary support, you have the opportunity to mentor students by supplying materials, time, or tours.

Network Building

connecting students with leaders in STEM and facilitating mentorship opportunities

Hands-On Training

with industry professionals to provide a window to today's technical environments

Educating

the next generation of supply chain and logistics leaders through:

- **Workshops:** Classroom teachers work together with industry leaders to create workshops at all educational levels. The goal: creating opportunities for students to engage with supply chain and technological integration, while supporting teachers in STEM education.
- **Industry Tours:** Industry tours allow students to see the practical application of STEM theory/ From Automotive Manufacturing, Aeronautics, Warehousing, Distribution, and all sectors under the Supply Chain umbrella, students can visit and engage with all levels of supply chain that support industry development.

Developing

our community with the support of our local leaders to grant:

- **Scholarships:** Scholarships support students interested in two-and four-year degree programs who have demonstrated excellence in STEM, or related supply chain studies, as they seek higher education.
